INTRODUCTION

Hello,
I have pleasure to introduce myself as the owner of the company named "Silica Industries" located at prime location in the country i.e., Delhi, in India.

We Produce a wide range of Fans. Silica Fans are being exported to various Gulf, Middle East, African & Asian Countries.

Silica ceiling fans use ADM technology with computer aided alignment. Its aero-dynamically balanced aluminium blades ensures superior air throw and for longer distances. These fans have double ball bearings precisely aligned for noiseless performance. Its regulator can save up to 30% energy and give optimum performance. The inner Body is made of Aluminium which starts heating after a long time and get cooled very quickly.

The fans are 100% powder coated and are hence corrosion resistant and have a longer durability.

Silica Table & Wall-mounted Fans are available for different applications. They are designed for easy installation. Available in various speeds, the fans have adjustable tilt angles and degrees of sweep.

The pedestal fans can be adjusted to various heights to suit personal comfort levels.

The Exhaust Fans are available in heavy duty and light duty models. The fans are equipped with heavy duty capacitor and low power consuming motor.

In this highly competitive market, we are able to sustain and progressively register increased sales volume year after year, merely because of Total commitment to Total Quality Management at every stage of manufacturing till the goods are delivered to our esteemed buyers. Quality audits and stringent checks are built into our quality controls systems so as to maintain highest levels of quality of our products.

Looking forward to your esteemed organization & assuring you the best services at all times from our side.

With regards

Ajay Kumar Jain
